ABOUT US

Reliable Access, Roofing and Construction Solutions

SHL Construction is the scaffolding and roofing division of SHL Group Services Ltd, delivering safe access solutions, high-performance roofing and reliable construction support across the UK. NASC-accredited and backed by over 25 years of experience, we operate where precision and dependable workmanship matter most.

From our bases in Essex and Aylesbury, we support contractors, FM providers and public-sector frameworks across London, the Southeast and the Midlands, delivering complex scaffolding, roofing programmes and associated construction works across residential and commercial projects.

We manage multi-site frameworks for clients including AMEY and VINCI Facilities, delivering controlled, compliant works on live and operationally sensitive sites, underpinned by an award-recognised commitment to health, safety and wellbeing.

25+ Years **2M+** Packages

OUR VALUES

Clarity, Safety & Workmanship You Can Depend On

Safety That Shapes Every Decision

We follow NASC processes and industry best practice, delivering safe, compliant structures on every site.

Consistency You Can Rely On

Delivery is steady, predictable and aligned with your programme, ensuring smooth progress for your project.

Technical Craft, Practical Execution

Skilled teams design and build solutions that suit the site, the programme and the operational environment.

Quality That Stands the Test of Time

Durable materials and accredited methods ensure results that reduce maintenance and protect asset value.

MEET THE DIRECTORS

Leadership built on experience, standards and a clear direction.

SHL Group Services is led by a hands-on management team with a shared commitment to delivering work safely, professionally and to a consistently high standard.

At the forefront of that team are Daniel Baldwin and Ricky Mackintosh, who bring together operational experience, commercial knowledge and a clear understanding of the industries SHL serves. Their approach is straightforward: build strong relationships, maintain high standards and ensure every project receives the attention it deserves.

Together, they continue to shape the direction of SHL, supporting its growth while maintaining the values and working relationships the business has been built upon.

Daniel Baldwin

Group managing Director

Daniel joined SHL Group Services in 2024, bringing hands-on experience within the scaffolding industry before progressing into health and safety consultancy. His practical background has helped strengthen compliance, safety and operational standards across the business.

As Group Managing Director, Daniel leads SHL's strategic growth, focusing on quality, client relationships and ensuring projects are delivered to the professional standards the company is known for.

Ricky Mackintosh

Group Director

Ricky Mackintosh MCIOB is an experienced construction professional specialising in commercial management, contracts and business development. With extensive experience across the scaffolding, roofing and construction sectors, he supports projects from tender through to successful completion.

Working closely with clients and contractors, Ricky develops strong relationships, identifies new opportunities and provides the commercial expertise needed to help deliver successful projects.

WHY PARTNER WITH SHL GROUP?

A dependable delivery partner for complex UK projects

01 Proven Performance on Frameworks

Trusted to deliver multi-site programmes for clients including AMEY and VINCI, we operate with consistent standards, scalable resources and clear communication across every location.

02 Seamless Team Integration

Our teams align with your processes and site requirements, working as an extension of your operation to maintain momentum and avoid disruption.

03 Expertise in Live Environments

We deliver confidently within occupied and operational settings, maintaining strict site control while minimising impact on residents, services and ongoing activities.

04 Built for Long-Term Partnership

We focus on reliability, clarity and proactive support, forming trusted relationships that strengthen programme delivery and support long-term objectives.

HOW WE OPERATE

- Planned Approach
- Clear Communication
- Consistent Standards
- Accountability

SCAFFOLDING SERVICES

Engineered Access for Complex Construction Environments

SHL delivers engineered scaffolding solutions that support safe, efficient progress across residential, commercial and industrial sites. Every structure is designed to enable clear sequencing, secure access and confident project delivery, even in the most demanding environments.

Built to exacting standards. Delivered without disruption.

As NASC-accredited contractors with over 25 years of experience, we design, build and manage scaffolding systems that prioritise stability, compliance and operational continuity. Our teams understand how access impacts programme flow, safety performance and site productivity.

From new builds and refurbishments to cladding remediation and complex live environments, our scaffolding is tailored to each site's unique requirements.

Planned access solutions.

Tube & Fitting Scaffolding

Flexible access systems for complex and non-standard structures.

System Scaffolding

Efficient, repeatable solutions for programme-driven projects.

Refurbishment & Remediation

Specialist access for sensitive façades and occupied buildings.

Commercial, Residential & Industrial Projects

Providing safe, compliant scaffolding across sites.

High-Value Scaffolding Packages

Delivery of access packages valued at £2M+.

ROOFING SERVICES

High-Performance Roofing Systems Built to Last

Our roofing division delivers complete re-roofing, waterproofing and refurbishment solutions for residential, commercial and public-sector buildings, combining technical expertise with reliable programme delivery.

Working to NFRC-Accredited Standards.

We design and install durable roofing systems that protect building fabric, improve energy performance and support long-term asset management strategies.

From traditional pitched roofs to advanced flat-roof and sustainable systems, our teams operate confidently within live and occupied environments — maintaining safety, minimising disruption and ensuring every installation performs as intended.

Designed for durability.

Traditional & Pitched Roofing

Slate and tile roofing solutions that combine durability, weather protection and visual consistency. These systems are suited to residential, commercial and refurbishment projects where long-term performance and appearance are equally important.

Flat Roofing Systems

Our flat-roof capability includes hot and cold melt systems, reinforced bituminous membranes, single-ply solutions such as PVC, TPO and EPDM, liquid-applied systems, GRP, built-up felt and self-adhesive membranes. Each system is specified to suit building use, exposure and maintenance requirements.

Specialist & Sustainable Roofing

Roofing systems including zinc and aluminium metal roofs, warm, cold and inverted constructions, as well as green, blue and biosolar roofs. These solutions support environmental performance, drainage control and long-term asset strategy.

CONSTRUCTION SERVICES

Integrated Construction Support for Live Environments

SHL Construction delivers controlled, programme-led construction services that support refurbishment, maintenance and framework delivery across residential, commercial and public-sector environments.

Built Around Safety, Sequencing and Site Control

Our construction capability provides dependable, multi-discipline support where safety, sequencing and continuity matter, with works planned to minimise disruption across live and occupied environments.

We work in partnership with contractors and FM providers, coordinating construction activities through clear communication, experienced site management and consistent standards across single and multi-site programmes.

Supporting site delivery.

Internal Fit-Out & Refurbishment

Controlled internal works, including layout alterations and finishing trades, maintaining quality, compliance and continuity.

Property Maintenance & Upgrades

We support local authority, commercial and managed estates with planned and reactive maintenance, delivering repairs, decorations and improvement works.

Building Works & Installation

Associated construction works including doors, windows, access installations and electrical works, ensuring coordinated delivery alongside roofing and scaffolding programmes.
